Travel Explorer

[Travel Explorer \(TraX\)](#) offers a centralized source of travel information to include travel assistance, training, access to trip tools, and other useful information.

- Travel Assistance**

[TraX](#) provides assistance to DoD travelers by functioning as an extension of the [Travel Assistance Center \(TAC\)](#). Travelers/Administrators have the ability to submit a help ticket, and track the progress of open tickets, while TAC representatives conduct research, or search and review responses to previously submitted questions.

Before submitting a help ticket, users are encouraged to use the Knowledge Center which provides instant access to hundreds of frequently asked questions and corresponding answers. Users can search, rate, and receive automatic notifications of updates related to questions.

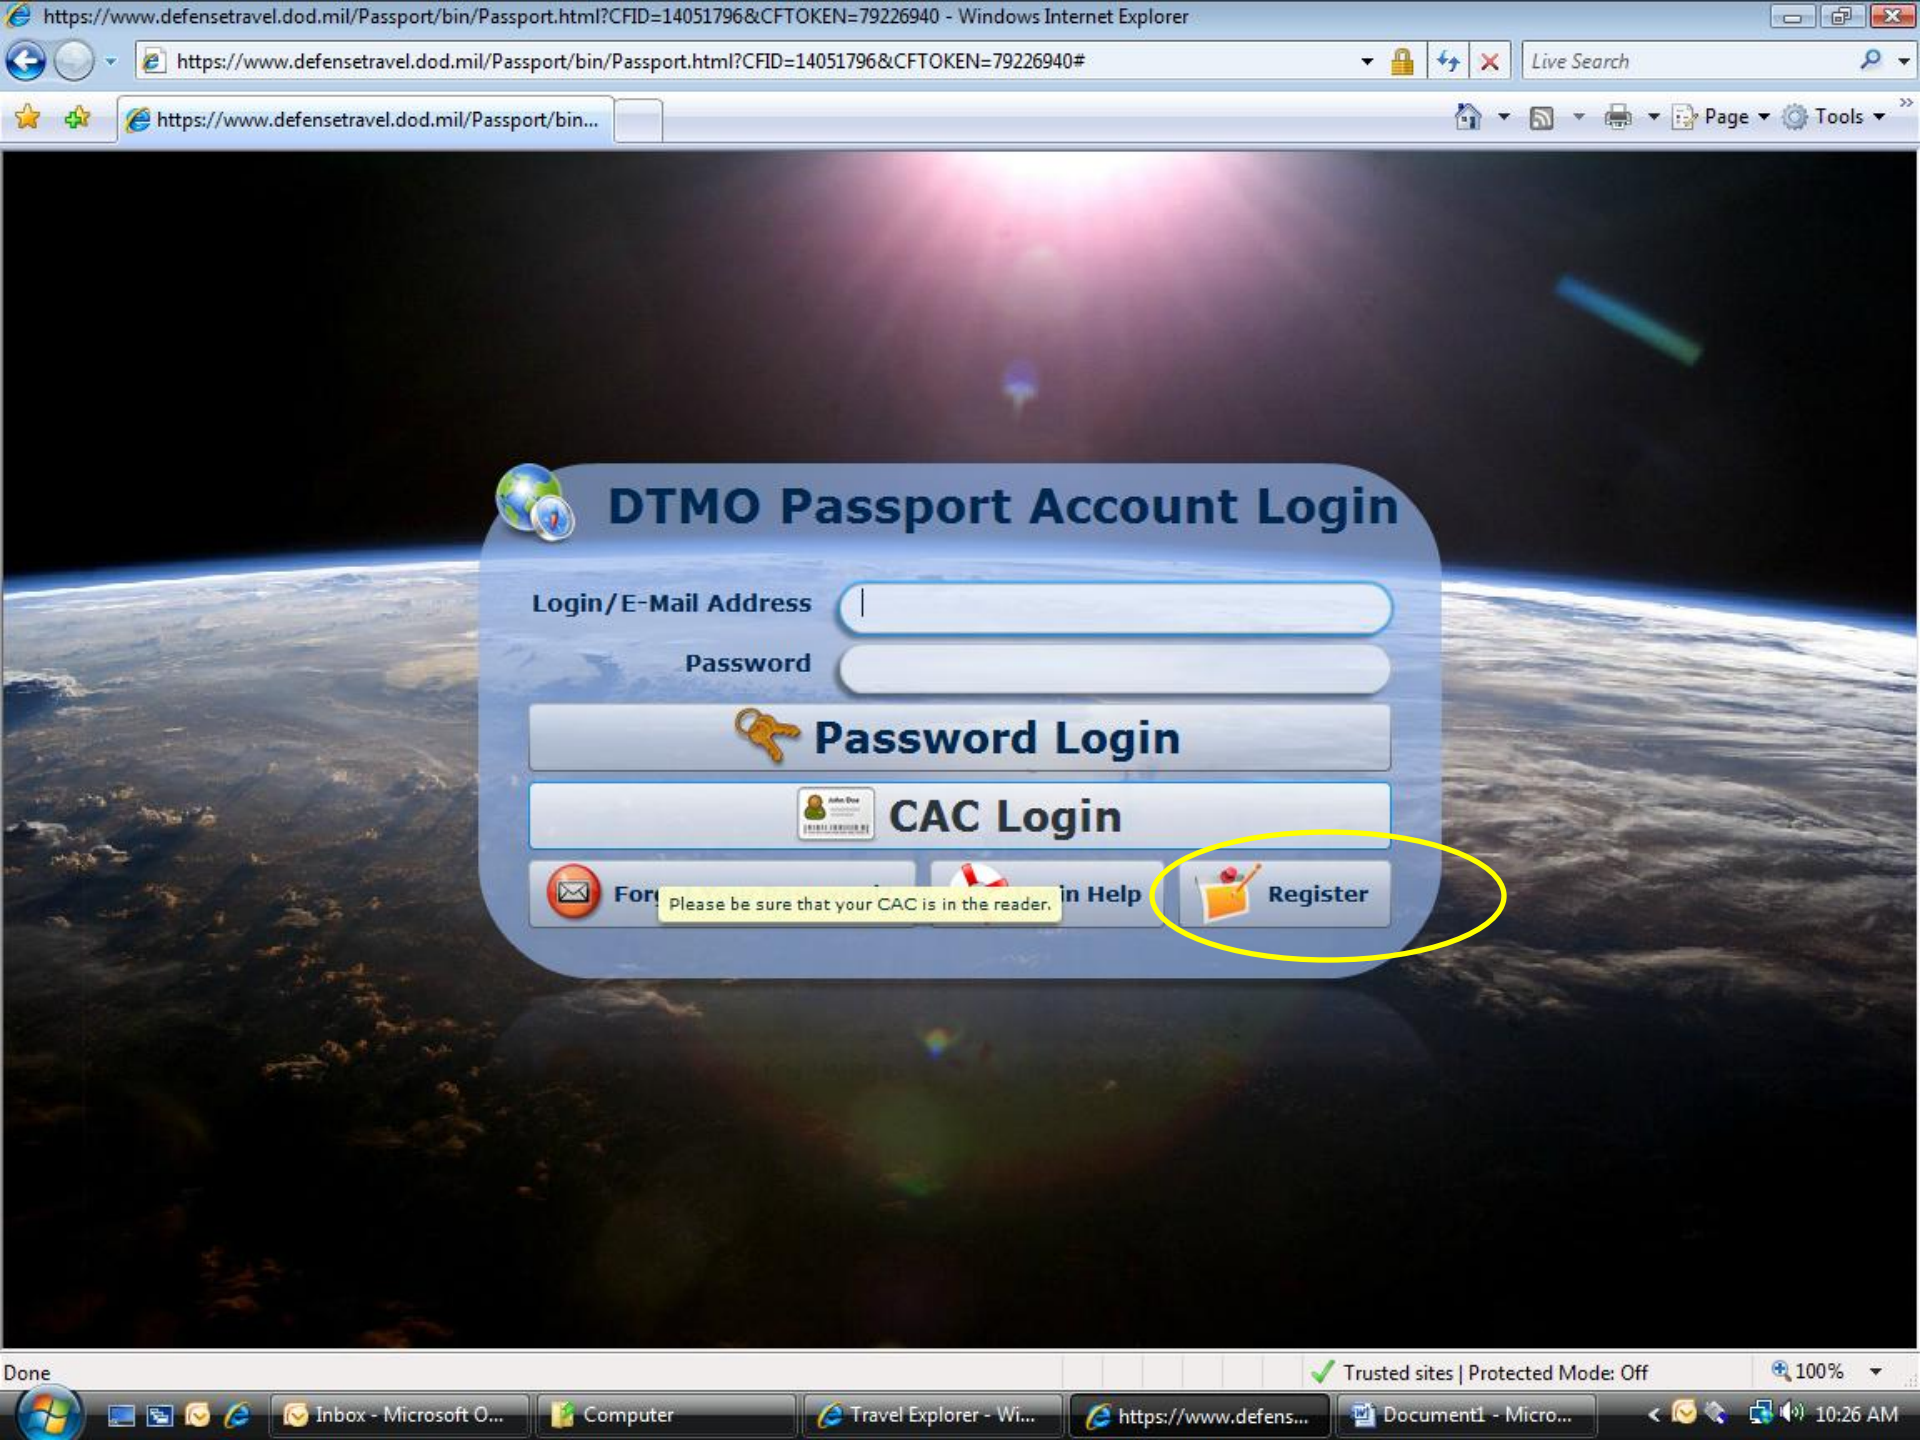

- Training**

The Training section allows access to all travel training offered by DTMO. [TraX](#) will recommend courses based on the role selected by a user. [TraX](#) can also provide a full listing of available courses including web-based, distance learning, and instructor-led formats. Once the desired course has been selected, users can launch a web-based course or register for upcoming sessions. In addition, [TraX](#) maintains a user's class schedule and keeps a record of completed training.

- Trip Tools**

[TraX](#) can provide trip planning information on airline City Pairs, per diem rates, rental car ceiling rates and destinations forecasts. Trip Tools can be used to estimate travel costs, provide maps and location reports that include travel advisories, health and safety considerations, embassy phone numbers, as well as weather forecasts.

Registration

Complete the following to register for an account.

Log-in Email	<input type="text"/>	* Required
First Name	<input type="text"/>	* Required
